Profile

Reliable, qualified, and experienced graphic designer working mainly in the IT industry, particularly in software houses. Excellence in creativity, problem-solving, time-management, and technical skills. Offering industrial exposure and providing design solutions for a broad range of webmasters and app developers. Works well with the team of graphic designers, and highly participative in business meetings.

Experience

Graphic Designer

I Led a team that focused on providing designs to e-commerce websites. Completed most orders in a 6-month period and won the perfect designer award.

Web Designer

I worked on testing and improving their websites' designs. Worked with different content management systems and prepared plans for website structure and design.

Graphic Designer

I created original graphic designs, including images, sketches, and tables. I've built page navigation buttons and search fields.

Education

Masters in Information Technology

The field of my research in the post-graduation degree was "The role of the efficient interface in medical applications."

Bachelors in Computer Science

I had 4.0 CGPA in my undergraduate degree. My project got the first position at the international level that helped me won a gold medal.
